# Simple comfort

Enhanced patient comfort and long-term compliance with one value-based system.

SleepEasy with C-Flex offers patients and providers a simple, reliable and cost-effective sleep therapy system with the proven benefits of C-Flex technology and the convenience of Visual Inspection Check (VIC).

### **SleepEasy sleep therapy system**

The SleepEasy sleep therapy device was designed to give your patients an affordable therapy option while allowing you to reap efficiency gains by proving compliance without the time and effort associated with collecting data cards or downloading devices. The SleepEasy with C-Flex system is extremely simple to set up and use. The basic functionality and straightforward user interface make it quick and easy for the DME to set up and simple for patients to use. That makes the perfect platform for the enhanced SleepEasy with C-Flex system.

### **C-Flex pressure relief technology**

SleepEasy with C-Flex adds clinically-proven Respironics Flex technology to make it a system your patients will find even more

comfortable to use night after night. Using Respironics Digital Auto-Trak algorithm to sense the onset of expiration, C-Flex delivers just the right amount of pressure relief at just the right time, making it easier for patients to adjust to therapy. How effective is C-Flex? Patients on C-Flex pressure relief technology have shown a one hour and 42-minute increase in nightly use versus traditional CPAP after three months!<sup>1</sup>

### **Enhanced Compliance Visual Inspection Check (VIC)**

Our new VIC feature allows the clinician to track use and verify that patients are using the system consistently. This feature enables you to easily track and verify patient compliance enhancing optimum patient care. An on-screen compliance report plus phone-in compliance are designed to document whether or not patient use is greater than four hours per night for at least 70 percent of the nights in a consecutive 30-day window within the first 90 days of use. SleepEasy with C-Flex is the perfect choice for those who want C-Flex and humidification but prefer non-removable media to track compliance.

Find comfort in the simple things. Like SleepEasy with C-Flex.
