

New Easy-to-Fit CPAP Interface

The *DreamFit*™ nasal mask from Puritan Bennett expands our selection of CPAP interfaces. This cost-effective mask features simple adjustments that make it easy to fit a wide range of patients. And the open design minimizes contact with the face, so it's comfortable to wear night after night.

[dreamfit™ nasalmask]

- > **The *DreamFit* nasal mask has a number of features to enhance comfort and allow greater freedom of movement.**
 - Airway hose routes over the head to enable sleep in virtually any position.
 - Flexible “bellows” chamber between the mask and interface swivels to accommodate patient movement and help prevent leaks.
 - Soft, pliable mask creates an effective, yet comfortable seal.
 - Quick-release clips make it easy for patients to apply and remove interface.
 - Soft, stretchable Breath-O-Prene® straps keep moisture away from the skin for greater comfort.
 - Vent hole is angled upward to direct air away from bed partner.
 - Comes in three mask sizes (shallow, standard and large) to fit different facial sizes and shapes.
