FlexiFit™ 432 Full Face Mask

Provided for your reference by
cpapXchange.com

Our second generation Full Face Mask, the **FlexiFit™ 432**, incorporates a soft Foam Cushion that works with the highly contoured Silicone Seal to provide improved sealing technology and a more comfortable fit.

FlexiFit™ Technology has been incorporated into the contoured Silicone Seal to allow a large range of nasal bridge movement and simple one step auto adjustment fitting. The unique **Glider™** Strap provides freedom of movement while maintaining a seal. The crown strap and Under Chin Design provide extra stability and maintain a fit even with jaw movement. The Easy-Release Strap allows simple removal of the mask and the “Fit and Forget” Headgear ensures no on-going adjustments are required.

The **FlexiFit™ 432** Full Face is supplied fully assembled and is available in Small, Medium or Large.
