The F&P InfoSmart™ Software has been designed to work hand in hand with the F&P ICON™. The F&P ICON™ has been designed from the outside-in to answer the strong call for a contemporary, compact CPAP that blends seamlessly into any bedroom environment, helping to break down some of the traditional resistance associated with CPAP therapy.

Inside the F&P ICON™ is a comprehensive set of intelligent technologies, integrated into one stylish solution to deliver new levels of therapy, while effectively meeting your business needs.

F&P InfoSmart™ Software provides:
- A patient management system for all Fisher & Paykel Healthcare Smartstick™ enabled CPAPs including:
  - F&P ICON™ family
  - SleepStyle™ CPAPs with SmartStick™ Technology
- Comprehensive patient reporting that offers:
  - Compliance data from first use
  - Summarized efficacy data for any 30-day period
  - Detailed efficacy data for any 7-day period
- Compatibility with multiple data communication methods:
  - Telephone reporting
  - SmartStick™

F&P Infosmart™ Software offers more insights into a patient’s treatment with less complexity.

F&P Infosmart™ Software is an advanced patient management software solution that is compatible with all Fisher & Paykel Healthcare Smartstick™ enabled CPAPs. Tracking patient progress is vital for business success.

Data Communication Tools
- Telephone reporting: the patient can relay sleep data from the display screen of the device, which can then be verified using F&P Infosmart™ Software.
- Smartstick™: utilizing generic USB technology which provides large data storage capacity. The patient can mail the Smartstick™ to you for download direct to F&P Infosmart™.

Data Reporting
- Treatment compliance and efficacy reporting is a key factor for comprehensive patient follow-up and therapy outcomes. F&P Infosmart™ Software produces comprehensive charting and reporting of patient data including:
  - 30 days of cumulative summary data from first use, as well as summary data for a 14-day period
  - Compliance, designed to meet the United States’ CMS guidelines. The compliance metric provides an automatic calculation of patient compliance, and the percentage of nights that the patient used the CPAP for 30 consecutive days and includes patterns of CPAP use for 30 consecutive days. The Compliance Summary displays compliance statistics by the clinician. It shows the number of days in the reporting period that the patient used the device for 1-5 hours.
  - Detailed Profile: The Tableau profile summarizes information on usage and efficacy data.

SECTION 1: Summary Data
The Summary Data report displays cumulative summary data from first use, as well as summary data for a 14-day period.

SECTION 2: Treatment Profile Summary
The Treatment Profile Summary displays data for any 15 consecutive days and includes summarized information on usage and efficacy data.

SECTION 3: Compliance Summary
The Compliance Summary displays patterns of CPAP use for any 14 consecutive days.

SECTION 4: Detailed Profile
The Detailed Profile Summary displays data for any 15 consecutive days and includes summarized information on usage and efficacy data.
